

unnamedHid

General purpose HID middleman for fun features

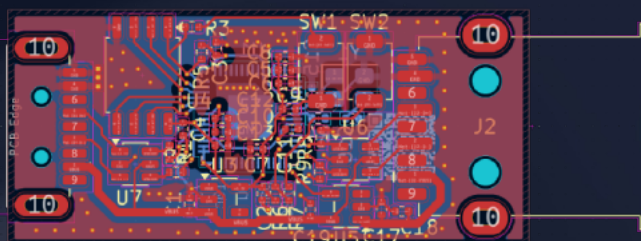

Imagine the famous omw →
On my way! correction on every device

A multipurpose HID middleman based on a RP2040. Anything from rubber ducky scripts to word-to-phrase replacements are supported

But wait! Doesn't RP2040 only have one USB PHY?
Turns out you can bit bang it with PIO! Enjoy programming macros to turn "banana" into "apple" or make it spam "larp". The choice is yours.
